

MILLGRAIN GROUNDNUT COMBINED HARVESTER

Features:

- ✦ Highly reliable
- ✦ Superior quality
- ✦ Extensively used

Description

Peanut combine harvester is the new type peanut harvesting machinery produced by our company. It combines digging, conveying, earth shaking, picking, cleaning, collecting and other functions. The peanut combine harvester adopts wide-track running system combined with peanut planting patterns. The tire indentation is in the furrow of peanut with light soil compact, convenient for residue fruit collection. Increases the picking rate.
