

MILIGRAIN TURMERIC POLISHER MACHINE

SPECIFICATIONS

A turmeric polishing machine is a specialized piece of equipment designed for the post-harvest processing of turmeric, a spice derived from the rhizomes of the *Curcuma longa* plant. The primary purpose of a turmeric polishing machine is to enhance the visual appeal of turmeric by removing adhering dirt, outer skin, and other impurities, resulting in a clean and polished product.

Turmeric polishing machines are typically constructed using materials that are suitable for food processing, such as stainless steel. This choice ensures durability, hygiene, and resistance to corrosion.

Turmeric polishing machines use a combination of brushes, air blowers, and other mechanical methods to remove impurities, dirt, and outer skin from the turmeric rhizomes. The goal is to achieve a polished appearance while maintaining the quality of the turmeric.

Capacity	250 Kg/h, 500 Kg/h, 1000 Kg/h
Operation Mode	Automatic
Electricity Connection	Three Phase
Motor Power	3 HP, 10 HP, 15 HP
Material of Construction(Contact)	Stainless Steel
Power Consumption	2 Kwh
Usage/Application	Commercial
Is It Portable	Portable
I Deal In	New and Second Hand
Country of Origin	Made in India
